

# DECARBONISING IT: HELPING BUILD AND SELECT THE CLEANEST SOFTWARE ON THE PLANET

Quantum Six in collaboration with **GoCodeGreen** can offer an independent assessment for those who are committed to challenging themselves and taking action to reduce the carbon cost of software and starting their journey toward decarbonising IT

## OUR APPROACH

1

### MEASUREMENT, PERFORMANCE & REPORTING

Analysing the carbon footprint of your software products

2

### SUSTAINABLE BUILD AND PRODUCT CREDIBILITY

Determining the optimal sustainability and carbon efficient approaches

3

### PROCUREMENT & INVESTMENT DECISIONING

Increasing your products profile in the selection process where ESG compliance is key

## DECARBONISATION STRATEGIES

By benchmarking your current carbon footprint against your peers and the overall banking market, Quantum Six and GoCodeGreen will deliver a report outlining the decarbonisation initiatives you can take to reduce your carbon footprint.

Enabling our clients to benefit from our combined experiences in achieving carbon neutrality and banking modernisation programmes.
